

There are also three (3) coatings which are TRADEMARKED and assigned to Plasma Coating Technologies Inc and are described below.

## **TRADEMARKED COATING**

### **NEXGENNEXCEL:**

This coating is the most suitable for machining, drilling and finishing for Titanium and Titanium alloys. This coating will increase the tools life at least by 10 times in comparison to uncoated cutting tools. This coating also provides better surface finish and reduces considerable amount of machine downtime
